Part V Writing**The Impact of the Internet on Interpersonal Communication**

Interpersonal communication refers to the activities of face-to-face information and emotion communication among people. However, with the development of science and technology, the communication forms have becoming increasingly diversified, digitalized and public-oriented in the last decade.

The wide spread of internet access and the use of QQ, MSN, E-mail, blog, micro blog and some other emerging network communication platforms have exerted fundamental influence on interpersonal communication. These network platforms are capable of helping people get information more quickly and accurately, and they can also broaden people's interpersonal circle. However, as everyone knows, everything has two sides. There are also negative points in these new types of interpersonal communication. For example, people may write blogs about their classmates or workmates around them, and these stories may be spread, thus influencing the relationships between people in reality. What's more, if people spend too much time and effort on blog writing, they may have no chance and spirit to have face-to-face communications. Consequently, their ability to deal with people in life may decrease.

For me, though emerging network communication platforms can benefit us, they

are only some ways of communication and will never take the place of face -to-face communication. Therefore, we should never neglect the effect of face-to-face contact in real life.

听力原文**Part I Listening Comprehension****Section A**

*Directions: In this section, you will hear 8 short conversations and 2 long conversations. At the end of each conversation, one or more questions will be asked about what was said. Both the conversation and the questions will be spoken **ONLY ONCE**. After each question there will be a pause. During the pause, you must read the four choices marked A, B, C and D and decide which is the best answer. Then mark the correct responding letter on Answer Sheet with a single line through the centre.*

Short Conversation

1. M: You don't look very happy. What's going on?

W: This afternoon, I drove my car to the garage to fix my air-conditioner. They just found some minor problems but charged me 400 dollars!

Q: What does the woman mean?

2. M: The exams are coming. I am really stressed.

W: If you cannot stand the pressure, you need to let off some steam rather than keep your feeling to yourself.

Q: What does the woman suggest the man do?

3. M: You are going to give an oral presentation tomorrow morning?

W: Yes, I'm like a cat on hot bricks now. There isn't much time left. I hope I won't look a fool in class.

Q: What does the woman mean?

4. W: I am really happy all the club members would like to donate money for the hospitalized schoolmate.

M: Me too. The medical fee is out of question now. We can call it a day.

Q: What does the man imply?

5. M: Building the new auditorium is beyond us. Our bank account is in the red.

W: Yes, we should have done a better budget.

Q: What is the man worrying about?

6. M: The film star who won the national prize for actor was imprisoned for his misbehavior.

W: He deserves it. Anyone should be behind the bars if he or she goes against the law.

Q: What can you infer from the conversation?

7. W: Jacky is not so sociable in his dorm-mates' eyes, right?

M: Yeah, kind of. He is the only son in his family and is inconsiderate to others. That may be the main reason.

Q: What does the man imply Jacky should do?

8. M: Did you apply for the job in the travel agency?

W: Yes, I did make a shot. It's a pity I can hardly make ends meet with the salary.

Q: What does the woman mean?

Long Conversation One

W: My daughter is just three years old and she has fascinated by television. I really don't

know if the machine has more positive effects or more negative effects?

M: To a three-year-old like your daughter, television is more beneficial than harmful because it is educational if watched moderately.

W: I agree with you. Preschoolers like my daughter learn colors, numbers and letters from television programs, like Sesame Street. They use animation and puppets to make learning fun.

M: Yes. When she grows as old as my son, she may prefer some science programs in which the host and hostess bring them to various locations to analyze everything from volcanoes to rocket launches.

W: So, how about you? How do you benefit from TV?

M: Personally, I widen my knowledge by covering important current news. I see and hear presidents' speeches, state funerals, natural disasters and election results live.

W: I learn a lot from these programs, too. Now, we have smart televisions. We can even invest in the stock market via TV hooked to the Internet.

M: Right. We can install software we need and accomplish specific tasks. People can register for a consultation without going to the hospital which brings great convenience for them.

W: Great! I didn't know our smart TV has such a function. I'll tell my parents about this.

M: TV is really a magic box, which provides relaxation, entertainment and education. However, we should not watch them constantly, let alone be slaves to it.

Questions 9 to 11 are based on the conversation you have just heard.

9. How do people make learning via TV fun for preschoolers?

10. How does the man benefit from watching TV?

11. What does the woman want to tell her parents?

Long Conversation Two

M: Is that Easycom Company?

W: Yes, sir, what can I do for you?

M: I am calling to complain about the laptop I purchased made by your company.

W: What is the situation exactly? Could you briefly describe it?

M: The deal took place online on June 5th, And the computer is delivered by your company to my house on June 7th. When I opened the box, I found there are some scratches on the screen.

W: Have you contact the cyberstore keeper and inform him of the situation?

M: Yes, I've told him about this. He said after the professionals examine the machine and make sure the problem is due to mistakes in the process of delivery, he will find a proper way to deal with this case.

W: After our staff member come to confirm this case, we will tell the store keeper to confirm this.

M: All right.

W: By the way, what do you think is the proper way to solve the problem if the responsibility lies in the delivery?

M: I would like the one who is responsible for that to arrange for another brand-new computer to be delivered to me as soon as possible. Otherwise, I would like to have my full refund.

W: Sir, we have recorded the whole thing and our personnel would come to check your machine within three weekdays. Thank you for your calling!

M: All right, thank you!

Questions 12 to 15 are based on the conversation you have just heard.

12. Why does the man call Easycom Company?

13. what is the problem with the laptop?

14. what should be done before the storekeeper finds a proper way to deal with this case?

15. How does the man want the problem to be solved if the responsibility lies in the delivery?

Section B

*Directions: In this section, you will hear 3 short passages. At the end of each passage, you will hear some questions. Both the passage and the questions will be spoken **TWICE**. After you hear a question, you must choose the best answer from the four choices marked A., B, C.and D. Then mark the corresponding letter on Answer Sheet with a single line through the centre.*

Passage one

The future in energy production is here. And some of the materials used to supply the energy may surprise you! Companies have developed a way to turn plant wastes and other garbage into fuel. It has been called one of the most promising technologies in alternative energy. And the process is expected to become more common this year.

The American-based company Fiberight is taking the lead in this new form of energy

更多接本资讯请关注“河北精通专接本”微信公众号

production. Truck loads of garbage are sent to Fiberight's test plant in southern Virginia. Randy Garrett heads the plant. He says old vegetables, cardboard boxes and other wastes become something much more valuable through the work done at the factory. Half of this material in this factory is going to be processed for the conversion of biofuel such as ethanol. Ethanol makes up about 10 percent of America's fuel supply. Traditionally, nearly all of it comes from corn, the food known as maize in some countries.

But Fiberight does not depend on corn to produce fuel. The garbage is loaded into a huge pressure cooker, which converts paper, cardboard, banana peels and organic fibers to a pulp for energy-fuel conversion.

The material coming out of the cooker is a substance that can be made into sugar. The sugar can then be turned into ethanol.

Ethanol production has yet to meet expectations. However, this year could be the turning point. But cars may limit how much the industry can grow. Only a few models of automobiles can operate on high-ethanol fuel. Without more of them, there is only so much gas from garbage that will sell.

Questions 16 to 18 are based on the passage you have just heard.

16. What is called one of the most promising technologies in alternative energy?

17. What is ethanol according to the passage?

18. why may cars limit the growth of the new fuel industry?

Passage Two

A popular expression goes, "What does not kill us makes us stronger." But when it comes to being bullied, that may not be the case. Increasing evidence suggests that the effects of being bullied do not end with childhood. The psychological and physical damage, such as anxiety and depression, can continue into adulthood.

A recent Duke University report shows that bullying can have permanent effects. The report is based on research that began in 1993. The Great Smoky Mountains study observed 1420 children from western North Carolina for years. The scientists followed the people as they went through childhood to teen years and into young adulthood. The Great Smoky Mountains study also found something completely new about bullying. It seems that the bullies were healthier than the bullied-at least when talking about CRP levels.

William Copeland led the study. He is a professor of psychiatry and behavioral sciences at Duke University Medical Center in North Carolina. He says a higher social standing for

bullies might explain their lower CRP levels.

Experts on bullying worry about that message. They say that a health gain should not be understood as permission to bully.

Bullying is a serious childhood experience that is no longer found only at schools and on playgrounds. Online or cyber bullying can make even a child's home feel unsafe. Some children who are bullied have killed themselves. Sometimes bullies even kill their victims.

Questions 19 to 22 are based on the passage you have just heard.

19. What does the recent Duke University report reveal according to the passage?

20. What is the new finding about bullying and health?

21. What do the experts on bullying worry about?

22. What kind of bullying can make a child feel unsafe at home?

Passage Three

Informal business sectors make up a large part of South Africa's economy. These stores and services are important for job creation in a country with an unemployment rate of at least 25 percent. But immigrant-owned and foreign retail companies are increasing their share of the South African market. As Mario Ritter tells us, that has hurt local traders who operate informal businesses called "spazas."

John Stheole has owned his spaza for more than 10 years. It offers many kinds of goods—from soap to sweets.

Spaza means "just getting by." The shops are found in non-white communities where larger, more official stores are not available, or are too costly.

There are about 100,000 spazas in South Africa. They employ 290,000 people. But few have paid attention to the part these stores can play in creating jobs.

Research shows that what is called the "informal sector" in Africa is very large. Informal workers can be self-employed or wage-earners. Last year, the African Development Bank said the informal sector provides about 55 percent of the economic productivity of African countries south of the Sahara Desert.

But business has been slow for native traders. Reduced profits for native traders, and high unemployment rates, have caused tensions in the country. Immigrants are accused of taking jobs from South Africans. Some also believe immigrants hurt South African shopkeepers by selling goods at lower prices. In September, more than 100 Somali-owned spazas were attacked during four days of Port Elizabeth.
