11-15 DADDB
16-20 DCDBC

SECTION B

- 21-25 CAFGE

Part IV Translation (30)

Section A Lexical Translation.

1. 亚太经贸合作组织
2. 麻省理工学院
3. 中国人民保险公司
4. 全国人民代表大会
5. 世界卫生组织

Section B Sentence Translation.

6. A person's character doesn't depend on how he or she enjoys victory, but rather he or she endures defeat.
7. The year 2015 will witness the 750th anniversary of that prestigious British university.

8. Owing to their long-term separation from their parents, these children often lack the care and affection they need.
9. Ecological conservation is vital for the well-being and future of mankind, and it brings about historical opportunities for the development of the world.
10. We must act now to ensure that future generations can enjoy humanity's common cultural heritage.

Part V Writing

How to Manage Money?

In recent years, how to manage money has been brought into focus and caused a heated discussion. Undoubtedly, managing money is vital to university students. As university students live in the ivory tower, they don't have a regular job and the majority of them count on the money given by their parents.

Then, as to money management, the methods could be briefly concluded as follows. In the first place, people must learn to keep accounts and budget their money. According to a recent survey conducted by Global Times, a high proportion of 80 percent university students use different methods to keep accounts, and they always consume more rationally than others. Moreover, taking a part-time job is helpful for students to manage money as well. Taking a part-time job can not only help students multiply their earnings but also make them know the difficulties of earning, which can in turn help them cultivate a positive way to deal with money.

To conclude, learning to manage money is of great significance for all of us. When applying the above methods, people will find themselves proficient and wise in managing money and they will have a comfortable and cheerful campus life.

6. Hunger and poverty have remained a “silent crisis”. They are like the “Achilles heel” deeply troubling all human beings.
7. I've planted roses all over my garden. When in bloom, they look like a sea of red.

8. The project of school building safety will make the school a safe place for children, thus setting parents' minds at ease.

9. Happiness is not a luxury, but something all members of the human family should enjoy.

10. By 2030, the number of people over the age of 60 will have surpassed that of children for the first time in history.

Part V Writing

Mass Media and the Intrusion of Privacy

In recent years, due to the growth of mass media and technological innovations, people seem to have less and less privacy. The case is worse for famous people such as public figures and celebrities. The mass media is frequently criticized for their excessive attention to the personal lives of famous people.

As far as I am concerned, what the mass media does is nothing but an intrusion of privacy. First of all, every citizen is entitled to a private life free from media intrusion, and celebrities and public figures are no exception. If a person is engaged in corruption, law-breaking, abuse of power or hypocrisy, the media has a right to uncover them, but not an individual's private life. Furthermore, an individual is protected by Right of Privacy from emotional harm such as embarrassment and humiliation, especially publicly. For most of the time, mass media deliberately hunts for novelty in order to draw the public's attention. Moreover, when the privacy of a celebrity is exposed, it is not just he or she who is harmed; many other people are dragged in. A harmonious family can be destroyed. If children are involved, the harm is immeasurable.

All in all, most of us need a basic human right to lead our lives without harassment or hindrance from anyone else. It is not only immoral, but also illegal to intrude an individual's seclusion or solitude, physically or mentally.

forgoing the cars and phones that usually come with the job.

8. Even some money from the European Union that was supposed to be used for routine operation and last until 2013 has already been spent.

9. It built a cultural center and invested in a small nursing home. But the projects were plagued by delays and cost overruns.

10. And when someone is ill, volunteers have to step in or the gym--open four hours a day--must closes.

Part V Writing

The Importance of Traditional Culture

With the rapid onset of globalization, there is a danger of standardization where you would find businesses like Starbucks and McDonald's everywhere replacing local companies and customs. I believe that while people generally, and specifically young people, welcome the new, there is great importance in preserving and promoting traditional culture.

First, traditional Chinese culture, such as martial arts, Peking opera, Chinese calligraphy and tea culture, has long been the common heritage of the Chinese people and contributed towards a sense of national unity and pride. With the entry of China into the WTO and its emergence as a strong economic and trading force, there has been a growing worldwide interest in China's history and culture. To meet this need the government has set up over 100 Confucius Institutes abroad to showcase China's cultural heritage. Second, the government has recognized the importance of traditional Chinese festivals by shortening the May holidays and reintroducing ancient festivals such as Tomb Sweeping Day, and Dragon Boat Festival. These holidays help to remind people of a need to respect their ancestors and to remember great heroes of the past.

In conclusion, the development of Confucius Institutes abroad and the promotion of traditional Chinese festivals at home have emphasized the growing importance of traditional Chinese culture and its relevance today.

7. Humans can't live in the forest because human beings aren't animals. Unlike us, animals

can adapt themselves to the wild or any environment naturally.

8. This was to legitimize the government's plan to remove tens of thousands of rural and hill tribe people from protected areas.

9. But tourism investors and generous visitors are allowed to enter this area.

10. They believe that they can cooperate with the tourist industry to properly manage and conserve "nature" under a national eco-tourism plan.

Part V Writing

Ways to make your life more meaningful

The famous saying "The greatest use of life is to spend it for something that will outlast it" is rather thought-provoking, which tells us the real meaning of life. It is contemporary social issue in China with common interests and permanent value.

In my view, there are good reasons to undertake meaningful things that exert positive and profound influence on the society, such as protecting the environment, helping vulnerable groups as well as promoting education. To illustrate, Abraham Lincoln never wavered in his devotion to democracy and equality, whose life has become an inspiration in the United States and throughout the whole world. His life, though limited, definitely lasts longer, and is a life worth living. Likewise, a young person who aspires to be a great writer might decide to buy some literary books or spend weekends writing and refining his works. Without any aspiration, he might simply end up spending all his spare time surfing online or playing Internet games.

In brief, a meaningful life serves to motivate and guide us in our daily lives. It provides us with the focus and direction that enable us to work towards accomplishing a special goal, objective or task.

6. Inequality is dangerous, he argued, not merely because it doesn't look good, but because inequality itself destroys upward mobility.
7. Increasing inequality and decreasing mobility pose a fundamental threat to the American

Dream.

8. A number of prominent economists have also argued it's harder for the poor to climb the economic ladder today because the rungs in that ladder have grown farther apart.
9. If we care about upward mobility overall, we're vastly exaggerating the dangers of the rich-poor gap.
10. So what factors, at the community level, do predict if poor children will move up the ladder as adults?

Part V Writing

On 2.5-Day weekends

2.5-day weekends in summer has aroused a debate among the public as it concerns people's family time and vacation plans. Many people believe that longer weekend will bring us more time to relax and boost tourism industry. However, this plan is only applied in summer and is not compulsory for all companies, so it has limited stimulation for tourism. From my perspective, 2.5-day weekends should not be adopted in China.

First of all, even though the plan is partially designed to encourage "leisure time", people are not necessarily given more time to spend with their families, because they need to make up the hours somewhere else during their week. So the plan does not make any sense if workers need to wake up earlier and stay up late during the other four days. Secondly, it is not worthwhile wasting a half day on Friday. If employees are allowed to take off at noon on Friday, it means most workers will be in a state of weekend in the morning on Friday, which may cause low efficiency in work. Meanwhile, companies will lose half-day productivity which is a great loss for small and medium enterprises. So we can predict that most private enterprises will not implement this non-compulsory policy.

All in all, 2.5-day weekends are neither necessary nor viable in China. So our weekend should be two days again, same as they were ever.

8. Realizing a better tomorrow will require integrated responses to interconnected challenges.
9. Goal 16 addresses democracy directly: it calls for inclusive societies and accountable institutions.
10. Human development is more likely to take hold if people are given a real say in their own governance, and a chance to share in the fruits of progress.

Part V Writing

On Pressure

In the modern social economy and the rapid development of science and technology, we have encountered a lot of pressure, pressure, employment pressure, as well as work pressure, etc.. How are these pressures formed? Now we're going to focus on learning pressure.

The examination has brought heavy pressure to the students' learning. There are many students worry about their examination is not good, excessive tension, resulting in student understanding and emotional distress, including anxiety, tension, sadness, tired, depressed, irritable, attention is not focused, and loss of memory, on the other hand, learning pressure over the general assembly, guided by the students interest in learning, learning persistence and perseverance, choice of decisiveness, the work of faith, and ability to endure setbacks will decrease. In addition, study pressure is too large, but also lead to some adverse physiological reactions, for example, eye fatigue, decreased visual acuity, headache, tinnitus, gastrointestinal bad, muscle pain, and insomnia.

Then we should be how to quickly and effectively alleviate the pressure of study? My view is: for their own learning plan, have a clear schedule, each time point what should be planned to have spare time to rest, and exercise time. Ensure every day to allow the brain to relax, to make yourself less pressure.

9. The sharing economy is taking off in China, where ride-sharing and apartment-sharing are becoming more and more common.

10. In order to win customers, bike-renting companies have been locked in fierce competitions.

Part V Writing

Can Wealth Bring Happiness?

Wealth and happiness always have countless ties. On the one hand, wealth can satisfy our material desires and therefore sometimes meet our spiritual needs. On the other hand, wealth can also bury our heads in the sand and bring misfortune to us at times. It's really hard to answer the age-old question "Can wealth bring happiness?"

In my point of view, I don't agree that wealth can bring happiness. I conceive of the two as not absolutely related. Happiness is not something that can be measured by wealth, but by the state of mind. For one thing, we all know that the world's wealth has soared during the twentieth century, and economists expect it to continue rising in the decades ahead. Does that mean that we humans are happier than our ancestors? I'm afraid the answer must be "no" or "it depends". Whether we are happy or not is determined by our state of mind. Wealth can buy us some material things but cannot free us from sadness or worries. For another, wealth can not bring happiness, neither can poverty. It's a mistake to assume that wealth will affect everyone in the same way. Being rich or poor, people make choices about how they treat wealth, and those choices can boost happiness or undermine happiness.

All in all, the amount of wealth doesn't represent the degree of happiness. Happiness can't be weighed by wealth. It has no absolute relation to wealth, but as a kind of feeling in our hearts it only rests with our own mind.

10. Debate is the platform where ideas are exchanged, so it is of great importance to clarify one's opinions.

Part V Writing

Ali-pay Payment

Nowadays, Ali-pay payment has become a common phenomenon in our daily life. Some university students did a market survey about using Ali-pay. According to the survey about Ali-pay, we found that over 95 percent of people in big cities use Ali-pay when they have to pay their bills.

In their survey, we found there are a number of reasons for it. First of all, it is convenient to pay the bills with Ali-pay, because most shops in China are in support of Ali-pay payment. All payers need to do is to scan the payment code and then enter the password. Payers can also open the payment code and let payees scan it. It's that simple! What's more, it is safer to pay with Ali-pay than cash. And no one else can get the money from you without the password. Last but not the least, paying with Ali-pay can get a certain privilege or discount in service.

Therefore, Ali-pay payment, especially among the youth, becomes fashionable in recent years. As far as I'm concerned, Ali-pay payment has brought many benefits and conveniences to people. With the rapidly development of science and technology, Ali-pay payment will become much safer and easier to use. Therefore, it can be concluded that more and more people will pay with Ali-pay in the near future.

Part V Writing

Will Tourism Bring Harm to the Environment

Tourism is a booming industry in China. With many travellers flocking to different destinations around China, tourism is becoming one of the most viable business market. However, air travel, car travel and other aspects of tourism are adding to China's pollution crisis that is becoming a big problem. As far as I am concerned, tourism will bring harm to the environment.

For one thing, thousands of people visiting one area can cause pollution. With so many visitors crowding into one place, there is an increasing demand for different means of transportation including cars, buses, etc. , which will emit more waste gases. Since exhaust released by automobiles is one of the main reasons causing air pollution, the booming tourism will surely result in more pollution. For another, many people who visit an area are sometimes careless in their actions. They leave food, paper, and bottles behind. They harm plants, animals or objects important to a local culture because those on holiday often do not understand the damage they many cause.

Polluted environment is really a pressing problem nowadays. Tourism is one of the main reasons that cause pollution. Therefore, some actions need to be taken to curb the development of tourism. For example, environmental levies should be placed on services and goods that visitors buy such as hotel rooms. Voluntary schemes should be encouraged. Driving should be discouraged through parking charges.

The Importance of Keeping a Good Mood

People in modern society live under a lot of pressures from many aspects such as education, career or family. It is importance to keep a good mood in your daily life. In the following context I am going to justify my point from two aspects.

First, individually speaking, to keep a good mood makes everything easier to you. Just like the grease smoothing a machine, keeping a good mood optimizes your life. If you are very happy, work would not seem to be that hard. You may learn to enjoy the process. Second, for the sake of people around you, you should keep a good mood. If you are very cheerful everyday, you are apt to throw your positive influence upon others who are also faced with various pressures. Just like a shining sun, keeping a good mood enables you to radiate your happiness to everyone around you and then they respond to you with an enlightening smile.

To keep a good mood helps to start a positive recycle around you which may free you from your pressure. Why not meet your life with a smile?
